Final Rejection

Applicant's arguments filed 1/5/04 have been fully considered but they are not persuasive for reasons detailed below.

The 35 U.S.C. 112 rejections are maintained or modified as follows:

These rejections have been withdrawn.

The prior art rejections are maintained or modified as follows:

Claims 1, 4, 10, 13 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagayama et al. ("Nagayama")(JP '540 A).

Regarding these claims, Nagayama teaches a device (Fig. 2, 3) comprising paths (25, 33) defining a common wedge-shaped region (near 40), a transfer region (top of 43), and a tongue-like guiding device (43), wherein said guiding device is capable of deflecting a copy out of the path via an actuating movement and is movable transitorily towards a transfer center line (i.e., middle between paths 25 and 33) (Fig. 2).

Applicant's arguments that Nagayama does not teach the claimed limitations are unpersuasive. Applicant is respectfully reminded that claim language consisting of functional language and/or intended use phrasing is given little, if any, patentable weight as the apparatus must merely be capable of functioning, or being used, as claimed. See MPEP 2112.02, 2114. Thus, the mere fact that Nagayama accomplishes the claimed function (e.g., "maintaining a separation of the copies") using a tongue shaped splitter rather than the exact structural feature taught, but unclaimed, by Applicant is not

Art Unit: 3653

relevant for purposes of patentability. Therefore, as Nagayama anticipates the claimed invention, Applicant's claims stand rejected.

Claims 1 and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Olivero (EP '098 A1)(Fig. 2, guiding device 62).

Applicant's arguments that Olivero does not teach the claimed limitations are also unpersuasive. Similar to Nagayama, Olivero also accomplishes the claimed function (i.e., "maintaining a separation of the copies"), thus it is unclear how Applicant can argue otherwise. Applicant is reminded that the claims define the scope of the invention and to make arguments based on these claimed limitations. Consequently, Applicant's claims stand rejected.

Allowable Subject Matter

Claims 2-3, 5-9, 11, 12 and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Examiner has maintained the prior art rejections, statutory rejections and drawing objections as previously stated and as modified above. Applicant's amendment necessitated any new grounds of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the

extension of time policy as set forth in 37 CFR 1.136(a). The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
